<td>Description:</td>
<td>The New York State Bridge Authority (NYSBA) invites technical proposals from licensed professional engineers to analyze and design system-wide joint repairs. NYSBA is interested in having plans and specifications developed to rehabilitate deck joints system-wide. The successful proposer shall evaluate existing joints at all NYSBA facilities and propose alternative materials/joints to replace deficient joints. All SEQRA tasks and all necessary permit pre-applications are a part of this assignment. The successful proposer will demonstrate to NYSBA a successful history of similar performance for operators with bridges of the type and size of NYSBA's facilities. Successful proposer will not propose a design scheme at this time, but should demonstrate expertise in design and familiarity with the standards of traffic control, reinforced concrete structures, environmental protection, civil and structural engineering as well as with NYSBA's bridges themselves. Requirements: Firms must be licensed professional engineers with extensive experience with NYSBA, NYS DOT or other government agencies. Firms must comply with NYSBA’s Equal Employment Opportunity Program, M/WBE and SDVOB goals. To request the proposal package, please contact Teresa Ceragioli, Assistant to the Chief Engineer, at <a href="mailto:tceragioli@nysba.ny.gov">tceragioli@nysba.ny.gov</a>. Total MWBE Participation Goals: 30%</td>
